

Project Development Phase

Date	03 July 2026
Team ID	
Project Name	India's Agricultural Crop Production Analysis
Maximum Marks	

Preprocessing Steps:

- Collected the agricultural cultivation dataset (1997–2021) from the source.
- Imported the dataset into Tableau Desktop.
- Checked for missing (null) values and handled them appropriately.
- Removed duplicate records to ensure data accuracy.
- Corrected inconsistent data formats and standardized column names.
- Verified data types (State, Crop, Season, Year, Area, Production).
- Converted numerical fields (Area and Production) to numeric data types.
- Organized the data for state-wise, crop-wise, season-wise, and year-wise analysis.
- Created calculated fields for KPIs such as Total Production and Total Area.
- Validated the cleaned dataset before creating visualizations.

Business Questions:

1. Which states have the highest agricultural production?

2. Which crops contribute the highest production in India?

2. How has agricultural production changed from 1997 to 2021?

3. Which season produces the highest crop yield?

4. Which states have the largest cultivated area?

5. Which crops show consistent growth over the years?
